

The Mighty Maestro - Logins and Groups

Paid Student Logins

A Student Login will guide the student through the Mighty Maestro, keeping track of scores and personal preferences. The student can log in from any internet connected device.

- Guides one student through all activities.
- Personal options and score tracking.
- Logins expire after 12 months.
- Activities locked when 100% achieved 3 times

Free Student Logins

The same as a paid Student Login but users can only access the first section (5 activities).

Teacher Logins

Anyone purchasing a Teacher Login can access all the activities for demos and class activities. Teachers can also use all the controls in the Console.

The Console

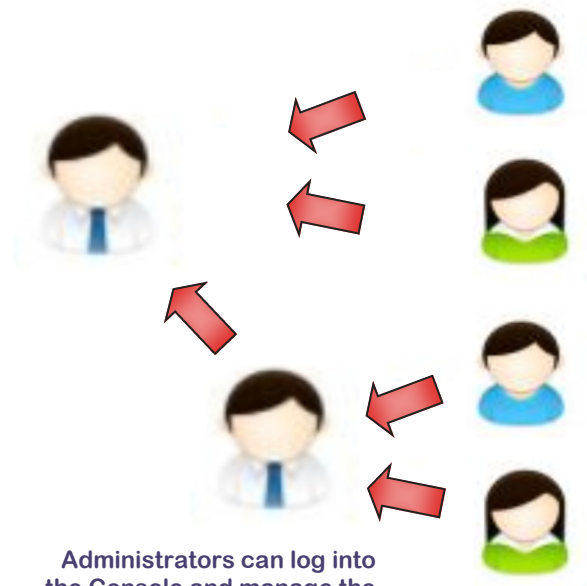

Anyone purchasing a Teacher Login or at least 10 Student Logins can access all these tools:

- Set up and manage groups.
- Follow student progress and update their accounts/reset passwords.
- Invite other teachers to become administrators.
- Send login details to parents via email.
- Much more...

Groups

The Purchaser has overall control. They can create, manage and delete Classes and Logins, as well as invite other teachers to become administrators.

All the Student Logins that you purchase will be placed in your Master Group. You can then move them into other classes as you wish.

Students who purchase their own logins (or create a free login) can also join your group at any time. Simply give them the Group ID and ask them to join using the tools within the application.

Administrators can log into the Console and manage the students in their classes.
