The Mighty Maestro - Logins and Groups

Shared Logins

Shared Logins are great if you'd like to demonstrate activities repeatedly or let students take turns completing tasks at school.

- Complete any activity, any time, repeatedly.
- Teacher or student use.
- One user at a time logged in.
- No personal options or score tracking.
- Expires after 12 months.

Single Logins

A Single Student Login will guide the student through the Mighty Maestro, keeping track of scores and personal preferences. The student can log in from any internet connected device, anywhere.

- Guides one student through all activities.
- Personal options and score tracking.
- Follow student progress using Group Management.
- Logins expire after 12 months.
- Activities locked when 100% achieved 3 times

Free Logins

The same as a Single Login, but users can only access the first section (includes 8 activities).

Group Admin

If you are the administrator of a group, you can track your students' progress and make changes to their accounts using Group Management.

To become an administrator, purchase at least one login and receive the Admin ID and Password from our system (anyone can use the logins thereafter - you just need the admin details).

All the logins that you purchase will become part of your group automatically.

Other users (even those with free logins) can join your group at any time. Simply give them your Admin ID.

To Join a Group

All logins purchased at one time will automatically be part of a group, but other users can join it at any time.

1. Make sure that you have the Admin ID (ask the Group Administrator or purchaser).
2. Set up a Free Login or purchase a Single Login.
3. Log in to the Mighty Maestro, then click on the *user icon* in the top-right. Select 'Groups'.
4. Enter the Admin ID.
