

www.TheMightyMaestro.com

Getting started in a band or orchestra? Learning some music at school? Would you like to know what all those strange symbols mean? Interactive and engaging, The Mighty Maestro is the perfect way to learn about basic music theory.

School purchases from \$3 per user.

Engaging Activities

A series of games, races and ear training tasks are used to introduce music notes, values, time signatures, dynamics and key signatures (in both bass and treble clef).

Get Started Free

The first 8 activities can be completed free of charge. Simply pop onto the website and create a free login. If you like the tasks, you may purchase a login and become a Mighty Maestro.

Home Purchases

A *Single Student Login* costs only \$14 for a year. This allows 1 student to work their way through all the activities, scoring 100% up to 3 times in any task. Students can log in from any location. Available online now.

School Purchases

Schools can bulk buy *Single Student Logins* from only \$3 each, letting students work from school or home. Or try a *Shared Teacher Login*, which allows you to repeat any activity for a year on one device. Shared Teacher Logins are great for use with IWBs or if you have a few computers in your classroom and are happy for students to take turns.

Group Management

Teachers or parents can easily create a group and track the progress of students using the Group Management tools. You can even include free logins in your group, but at least one purchase of any login must be made in order to generate the Admin details.

Details

Single Student Logins

Single Student Logins guide the student through the Mighty Maestro, keeping track of scores and personal preferences. You may log in from any location. By default one section has to be completed before the next opens up, although this setting can be overridden using the Group Management tools. An activity can be repeated until 100% is achieved three times, at which point it is locked. A Single Student Login must be purchased for each user; they cannot be shared. Logins expire after 12 months.

Shared Teacher Logins

Shared Teacher Logins are great if you would like to try the activities with a number of students but not follow their progress. Users can take it in turns to complete any activities in any order. Shared Teacher Logins are also great for teachers wanting to demonstrate ideas to different classes. Each Shared Teacher Login may only be used on one device. Logins last 12 months.

Home Purchases

Just purchasing logins for your own kids or instrumental students?

Home	Price	Expires After	Location
Single Student Login	\$14	100% achieved 3 times in each activity (max 1 year)	Anywhere
Shared Teacher Login	\$44	1 Year	Home

School Purchases

Large savings are available for multiple purchases from school.

Shared Teacher Logins can only be used by one person at a time. If you want a few students to work simultaneously (e.g. you have 3 PCs in your room) then you may purchase multiple Shared Teacher Logins.

School	Number	Price Each	Expires After	Location
Single Student Login	10-30	\$5	100% achieved 3 times in each activity (max 1 year)	Anywhere
	31-150	\$4		
	151+	\$3		
Shared Teacher Login	1	\$29	1 Year	School
	2	\$26		
	3-14	\$19		
	15+	\$14		

Technical Requirements

The Mighty Maestro is a website so is accessed through any internet browser. However, there are a huge number of possible browser/device combinations, some of which work better than others. Please use our free logins to check the usability with your device.

New Web Version

Our new web version has been designed for almost any device. PCs and Macs with the latest Internet Explorer, Chrome or Safari browsers generally work well. Portables such as iPads with Safari function well with most activities, but may be slow playing the short sound bites in some places (in which case you may pass and try again later on another machine).

Original Flash Version

You may still use our original Flash version from any computer with a Flash enabled browser and mouse. This works well with most PCs and Macs, but not with portable touch screen devices. Although free logins cannot be created, you may use the new version to generate a free login, note down the details and then use them on this version if you prefer.

Groups

You may monitor the progress of all students in your group as well as make changes to their accounts. These tools are accessed through the Group Management pages on our website. Each purchase generates an Admin ID which can be used to manage all the logins purchased at that time. You may also give your Admin ID (but not the password) to other users so that they can join your group (including those using Free logins to access the first section). At least one login must be purchased in order to generate the Admin ID.
